

Connecting to USI Wireless With Windows XP

On the Start Menu, click on Control Panel

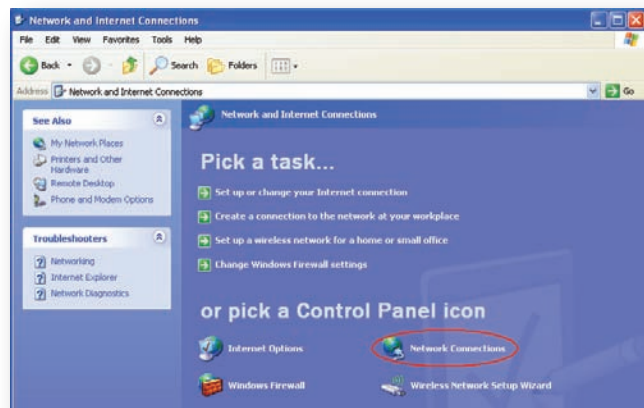

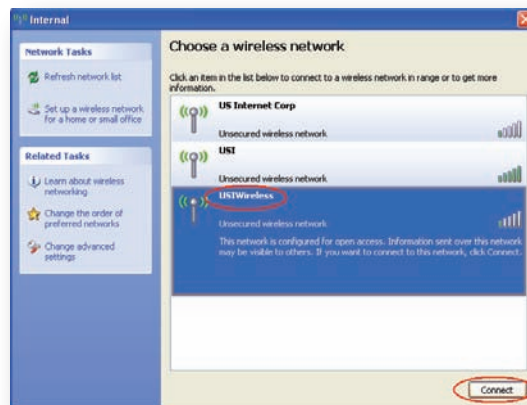

Right-click on your wireless connection, and select View Available Wireless Networks.

Click on Network and Internet Connections.

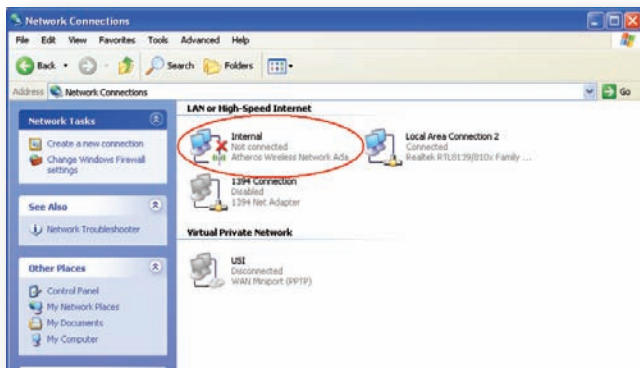

Select USI Wireless, and click on Connect.

Click on Network Connections.

You will get a dialog box warning about the unsecured network. Click on Connect Anyway.

Locate your wireless network connection. It will look like the circled one below.

Open your web browser and type <http://www.usinternet.com> in the address bar. You will be redirected to the log in site. Once you have entered your credentials, you are done!
